MISSION MINUTES

Church attendance in Britain is rising thanks to Gen Z.

The research found that last year around 12% of adults attended church at least once a month, up from just 8% in 2018.

Leading the charge were men aged 18-24, with over a fifth attending church at least once a month, a staggering increase from just 4% of that demographic in 2018. Women in the same age bracket have also been attending church in larger numbers, going from 4% in 2018 to 12% in 2024.

There are now over 2 million more people attending church than there were six years ago. Pray for revival across the world!
